

MRL Bulk Testing Service 2020-21

Maximum Residue Testing is essential for food safety and quality assurance programs. All growers that have implemented QA must have a MRL test completed prior to audit. FGT strongly recommends that all exported fruit is tested prior to harvest.

Chemical Tests Options

Several testing options are available (see next Page 2), choose your testing option according to your pesticide use and export market requirements.

Reporting

Results are available approximately 48hrs, 6 or 9 working days after the sample is received (48hr turnaround on basic test screen only).

Results will be emailed to you, your nominated packing shed, and exporter on request. A copy will also be kept on file with FGT.

Export Screen information will be collated de-identified and collated as part of the National Residue Survey <https://www.agriculture.gov.au/ag-farm-food/food/nrs>

Fruit Samples

Samples must be collected by an authorised person either on the packing line or in the orchard and placed in a sturdy sealed plastic bag.

For Microbiological analysis, disposable gloves are recommended before collecting a sample. Please refrigerate or keep in a cool location until collection or dispatch.

Sample Pick-ups

FGT staff will organise sample collection **for an additional fee** and this will occur weekly on Mondays (or closest working day). Information on scheduled collection dates will be posted on the FGT website at <https://www.fruitgrowerstas.org.au/growers/>, or by calling the FGT office on (03) 6169 2059.

Sample Drop-off

Fruit samples can be delivered to Fruit Growers Tasmania (262 Argyle St, Hobart) by 3pm (Monday to Thursday).

IMPORTANT NOTES

Sample request form must be emailed to: ian@fruitgrowerstas.com.au 24hrs prior to collection date and there will be a surcharge of 15% on top of test prices for non-financial FGT Members.
