Fruit Growers Tasmania Food Safety Testing Service 2024/25

Fruit Growers Tasmania facilitates food and water testing services for Tasmanian horticultural producers to assist with Quality Assurance and export trade requirements. Maximum Residue Testing is an essential component of food safety and quality assurance programs, and growers that have implemented QA must have a MRL test completed prior to audit.

Business benefits from the service include convenience, flexibility and industry bulk buying discounts. Results from sample tests will also contribute useful information to inform national industry management of agrichemical use.

Testing options to suit all businesses
Fruit Growers Tasmania provides a number of testing options aimed at the needs of the state's horticultural producers. All sample testing is carried out by NATA-accredited service providers, with users provided with a certificate of results at the end of the testing process.

Quotes for specialty testing packages can also be provided for chemicals not listed below. To find out more, please contact ido@fruitgrowerstas.org.au.

Fruit sample collection and handling
Information and guidelines for producers on sample collection and handling procedures can be found online at www.fruitgrowerstas.org.au/safety-compliance-testing/.

Sample dispatch dates
Normal dispatch days are Monday-Thursday only, subject to public holidays operating in Tasmania and Victoria. In weeks where public holidays occur, no samples will be sent on the day before or during a public holiday.

Receiving samples at Fruit Growers Tasmania Office
Samples for testing are required to be received at the Fruit Growers Tasmania Offices during business hours, or at a time of mutual agreement. Samples received between 9am and 3pm will be dispatched the same day where possible. Samples received outside this time will be refrigerated and dispatched on the next available dispatch day.

The Fruit Growers Tasmania office is located at 262 Argyle St, Hobart TAS 7000.

Pickup requests
Fruit Growers Tasmania staff can organise sample pickups on behalf of growers and packhouses. To make this as smooth as possible, Fruit Growers Tasmania asks that completed sample request forms be provided to Fruit Growers Tasmania:

- No less than 1 business day for samples to be collected by Team Global Express.
- No less than 3 business days for samples to be collected by FGT staff.

Fruit Samples
Samples must be collected by an authorised person either on the packing line or in the orchard and placed in a sturdy sealed plastic bag. Samples should be kept in a cool location until collection or dispatch.
Use of disposable gloves are recommended before collecting a sample for microbiological analysis.

Reporting of results
Results will be emailed to you and can be provided to your nominated packing shed and/or exporter upon request. A copy will also be kept on file with Fruit Growers Tasmania.
Results are available approximately 48hrs, 6 or 9 working days from the date of dispatch (48hr turnaround on Standard Screen and Supermarket Screen only). In the events of different turnaround times being selected, results will be provided in accordance with the slowest turnaround time.
Export Screen information will be de-identified and collated as part of the National Residue Survey.
